Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. The serial number of the U.S. application noted on page 10 of the specification should be provided. Note this requirement is brought forth from the first Office action.

Applicants' amendment filed 02/28/05 did not address this omission.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The position set forth in paragraph 3 of the first Office action is herein repeated.

Applicants' position regarding this rejection has been carefully considered but is not deemed persuasive since MPEP 2173.05(i) is directed to a case comprising a chemical formula.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 3652

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 4, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank.

Regarding applicants' intention to rest their bucket on its opening, the bucket in Frank figure 5 could be lowered to rest on its opening.

Applicants' argument regarding Frank and their amendment have been carefully considered but are not deemed persuasive since if Frank's figure 5 bucket were lowered to the ground it would meet this new limitation since the bulk of the arm structure would be positioned over the bucket.

7. Claims 5 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frank in view of Rae, et al.

It would have been obvious to route hydraulic lines in the arms in Frank in view of the teaching in Rae (figure 3).

Applicant's argument regarding this rejection has been carefully considered but is not deemed persuasive since Frank's figure 3 bucket could be lowered to the ground and would meet the newly added limitation as noted in paragraph 6 above. As for Rae this reference is utilized only for its teaching to route hydraulic lines.

Art Unit: 3652

8. Claims 2, 6, 9, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 14 and 15 are allowed.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
